AUSTRALIAN MADE

M150 SERIES ULTRA SLIM LINE INFLATABLE PFD TYPE 1

The M150 series inflatable PFD Type 1 is a light weight, comfortable and easy to don PFD.

M150 series fits all sizes from 40kg and above of body mass.

The ultra slim line design will provide the wearer with more comfort and freedom of movement.

The M150 series is similar to the popular SMA1060 series and inflatable life preservers SMA manufactures for the Australian Army (light Infantry) ,Australian S.A.S. and Australian Commandos.

The floating position of PFD is critical. The M150 series will float an unconscious person to a safe floating position with the head angled at 45° upwards in the water.

It has a freeboard of more than 120mm.

The Inflatable bladder is manufactured from high quality fabric (radio-frequency-welded yellow polyurethane coated nylon oxford buoyancy fabric) and inflation via a combined CO2 inflation manifold and oral inflation tube. The fabric is able to withstand 200,000 flex cycles without any physical damage.

The M150 series comes available in RED or NAVY BLUE.

The inflation method can be either MANUAL or AUTOMATIC (water activated).

*SOLAS approved Water activated lifejacket light is optional.

Bladder available in International Orange or Spanish Yellow
